RESEARCH INTERESTS

Deepfake detection, audiovisual representation learning, speech recognition, self- and semi-supervised learning, and robustness.

RESEARCH EXPERIENCE

NatWest Group | CAIRO

AI Research Engineer/Scientist Oct 2025–present

- Serve as the primary model designer for speaker verification, audio deepfake detection in telephony, and audiovisual deepfake detection.
- Design and apply self-supervised learning methods and develop personalised deepfake detection methods.
- Investigate model robustness to unseen generators, telephony distortions, noise and dataset shifts, and contribute to training data generation.
- Deliver internal talks explaining the group's models and research to colleagues across the bank.

Meta

Postdoctoral Researcher May 2024–Oct 2025

- Developed a unified model for audio, visual and audiovisual speech recognition; first-author paper at ICLR 2026.
- Introduced an efficient pseudo-labelling method that approximately halved training time versus the previous model (NeurIPS 2024) and improved robustness to longer utterances, noise and unseen domains.

Research Scientist Intern Jan–Apr 2022; May–Oct 2023

- Developed large-scale semi-supervised models for auditory and visual speech representations, leading to first-author publications at ICLR and NeurIPS.

External Research Collaborator Sep–Dec 2022

- Developed a scalable self-supervised model for joint speech and facial representation learning.

EDUCATION

PhD in Machine Learning Jan 2020–Apr 2024
Imperial College London

- Supervisor: Prof. Maja Pantic. Funded by an Imperial President's PhD Scholarship.

Thesis: Learning from Talking Faces: From DeepFake Detection to Speech Recognition.

Developed deepfake detection methods that generalise to unseen forgery types and remain robust to video corruptions.

MEng in Electrical and Electronic Engineering Oct 2014–Jun 2019
Imperial College London

- First Class Honours (83%); ranked second overall in the cohort.
- Ranked first in the third year (86%) and final year (89%); First Class results in every year.

SELECTED FIRST-AUTHOR PUBLICATIONS

Pay Attention to CTC: Fast and Robust Pseudo-Labelling for Unified Speech Recognition

Alexandros Haliassos, Rodrigo Mira, Stavros Petridis
ICLR 2026

Unified Speech Recognition: A Single Model for Auditory, Visual, and Audiovisual Inputs

Alexandros Haliassos, Rodrigo Mira, Honglie Chen, Zoe Landgraf, Stavros Petridis, Maja Pantic
NeurIPS 2024

BRAVEn: Improving Self-Supervised Pre-training for Visual and Auditory Speech Recognition

Alexandros Haliassos[*], Andreas Zinonos[*], Rodrigo Mira, Stavros Petridis, Maja Pantic
ICASSP 2024

Jointly Learning Visual and Auditory Speech Representations from Raw Data

Alexandros Haliassos, Pingchuan Ma, Rodrigo Mira, Stavros Petridis, Maja Pantic
ICLR 2023

Leveraging Real Talking Faces via Self-Supervision for Robust Forgery Detection

Alexandros Haliassos, Rodrigo Mira, Stavros Petridis, Maja Pantic
CVPR 2022

Lips Don't Lie: A Generalisable and Robust Approach to Face Forgery Detection

Alexandros Haliassos, Konstantinos Vougioukas, Stavros Petridis, Maja Pantic
CVPR 2021

* Equal contribution.

AWARDS AND HONOURS

- CVPR Outstanding Reviewer: 2022, 2024, 2026.
- Imperial President's PhD Scholarship.
- Henry Ford II Scholar Award for best academic record in final first-degree examinations, 2019.
- Second place, Citadel European Data Open, 2019.
- Dean's List (top 10% of cohort): 2015, 2018, 2019.
- Maurice Hancock Scholarship for excellence in the International Baccalaureate, 2014.

REVIEWING SERVICE

Reviewer for **NeurIPS** (2024–2026), **CVPR** (2022–2026), **ICLR** (2026–2027), **ECCV** (2022, 2024, 2026), **ICCV** (2023), **WACV** (2027), **ICASSP** (2023), and **IJCV**.

EARLIER EXPERIENCE

Schlumberger — Research Placement Apr–Nov 2018
Designed and evaluated image-processing algorithms for 3D seismic data alignment using MATLAB and C#.

DekaBank — Risk Management Intern Jul–Sep 2016
Supported the assessment of default probabilities for derivative counterparties.

LANGUAGES

English and Greek: fluent. German: C1 (Goethe).
